Optimism

1. Stardust struggled a little and turned into living beings...
After a while, some living beings became intelligent...
but something went wrong and all turns back into stardust.

Steps

2. When stuck, a step back will certainly let you advance one step farther!

Mind and soul

3. Is it free will that thing that lets me question my own free will?
4. Humans can be either rational or irrational. Notice how a thin line makes all the difference...
5. Deep down, in our heart, we certainly are all heart.

Loops

6. How big is an infinite collection of infinitesimally small things?
7. What happens if you think about your thoughts?

Creationism

8. Creationists should not complain anymore, only this much can be done in just seven days!
9. Creationists should never change because they may unintentionally evolve in some way!

Paradoxes

10. To see your shadow and still believe you do not have a dark side...
11. To see your face reflected in a mirror and not wondering about two-faced people...
12. To swim with sharks and not thinking about the fluidity of your current situation...
13. To run out of oxygen in water...

Words

14. Today? Yesterday running late or tomorrow running early!
However the optics, today is still running away...
15. As a matter of fact, all this controversy over matter and antimatter does not matter at all.
16. Light is a very special thing that allows us to see the darkness.
17. I am about to write a few verses about uni and multiverses.

Unreal

18. Even the whole world is a simulation, my tooth pain seems pretty real to me.
19. My immunity is not very good, so I would prefer to live in a virus-free computer simulation.
20. Sometimes I wonder if what happens in a simulation stays in that simulation.
